Formal Review Request Template

Requester: Natrez Crawford
Reviewer: Nishanth Manoj
Date: 11/02/26
Approx. review duration: 65 min

Choose **one primary review method**:

Code / Software Review

Code Quality Review
Inspect the code for issues such as readability, modularity, maintainability, efficiency, and appropriate programming practices.

White-Box / Edge-Case Testing
Inspect the internal logic and systematically test branches, boundary conditions, exceptions, or adversarial inputs.

Black-Box / Functional Testing
Develop test cases from the expected requirements or behavior and determine whether the software produces the expected results.

Performance / Runtime Testing
Systematically evaluate whether the software meets relevant runtime or performance expectations.

Usability Review

- **Task-Based Usability Testing**
  Give the reviewer/user specific tasks to complete while you observe what they do, where they succeed, and where they encounter problems. A think-aloud protocol may be used.
- **Heuristic / Guidelines Evaluation**
  Systematically inspect the interface using identified usability principles, heuristics, or design guidelines.
- **Prototype Usability Testing**
  Have users complete defined tasks using a wireframe, prototype, or partially implemented interface.

Design Review

- **Architecture / Conceptual Design Review**
  Evaluate whether architecture and major design decisions align with project requirements and constraints.
- **Preliminary Design / UML Review**
  Evaluate proposed system structure, diagrams, component relationships, interfaces, or other design artifacts.
- **Security Design Review**
  Evaluate relevant authentication flows, trust boundaries, data protection, error handling, or other security-related design decisions.

Other

- **Other review method:** _____
  _____

Explain what the reviewer will evaluate and why this method is appropriate for your work:

The reviewer will test the Perseverance topic from beginning to end to confirm that navigation, Firebase content, scenarios, scriptures, reflection, prayer, goal, and action pages work correctly. I will provide a demo since the reviewer does not have access to the mobile application

Review Request Details

1) What specifically should the reviewer examine or interact with?

Reviewer should see the Character Development section, select Perserverance, and complete the full lesson flow.

2) What question do you want this review to help answer?

Does the Perseverance lesson load the correct Firebase content and allow the user to complete the entire lesson without navigation, permission, or missing-content errors?

---

3) What should the reviewer focus on?

- Opening the Perseverance topic
- Loading the overview and lesson content
- Displaying a scenario and answer choices
- Loading the scripture connected to the selected scenario
- Displaying the reflection and prayer
- Loading the goal and action suggestions
- Confirming that the navigation between pages works
- Checking for Firebase or console errors

---

4) What should the reviewer *not* evaluate during this review?

- Do not evaluate the unfinished character-development topics, final visual polish, image placeholders, or topics other than Honesty & Integrity and Perseverance.
- Don’t evaluate the answer correctness for the scenario.

---

5) What should the reviewer use to judge the work?

I will provide a demo to show the perseverance topic and how it should flow. The reviewer should use expected lesson behavior, successful Firebase content loading, correct topic

navigation, and the absence of console or permission errors. The feature is successful if the reviewer can complete the Perseverance lesson from beginning to end.

Reviewer Section

1) Briefly describe what you actually did during the review.

Examples include executing defined test cases, inspecting particular code paths, observing a user completing defined tasks, or systematically examining a design against specified criteria.

I watched the Sprint 3 demo and followed how the Perseverance lesson worked from beginning to end. I checked how the user moved between the different pages, how the lesson content appeared, and whether the scenario questions and response options were working. I also looked at the reflection and goal sections to see if there were any noticeable problems during the demonstration.

---

2) What portions of the artifact did you evaluate?

I reviewed the Character Development section, mainly the Perseverance topic. This included the lesson overview, scenario questions, scripture content, reflection page, and the goal and action steps. Also checked the navigation between these sections and how the content was displayed on the screen.

---

3) Provide or link to relevant evidence such as test cases, screenshots, notes, annotated code, observations, or other review artifacts.

I used the Sprint 3 Demo for Formal Review recording from November 2, 2026. The video shows the Perseverance lesson being opened and the user going through the different sections. I used the recording to check the navigation, content displayed, and any visible issues.

Findings

Strengths:

- The Perseverance topic was easy to find in the Character Development section. The lesson also had a clear order, making it easy to follow the different steps.

- The scenario questions and response options were displayed clearly. The reflection and goal sections also gave the user a way to enter their own answers, which made the lesson more interactive.
-

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggestions
there was a loading screen when moving between sections.	low	A loading indicator appeared after the scenario section.	Check if the loading time can be reduced or if a clearer loading message could be added.
The keyboard takes up a good amount of the screen when entering responses.	low	During the reflection and goal sections, the keyboard covered part of the page.	Make sure users can easily scroll and access the buttons while typing.

Requester Follow-Up

1) How will you address the feedback? If you decide **not** to, briefly explain why.
